Internal Gear Shifting

The Makeshift from Rodriguez

starts at \$2,999

The internally geared hub (IGH) is a different approach to cycling than a traditional derailleur setup. The IGH offers smooth shifting, rugged design, and a simplified drivetrain. The Rohloff Speedhub gives you 14 speeds with a gear range of 526% (more than traditional touring bike setups). It's German engineering at it's finest and near indestructible. We also offer the Shimano Alfine IGH for the more budget conscious rider.

The DNA

- IGH hub - say goodbye to derailleurs
- 14 speeds with Rohloff - 11 with Alfine
- Optimized braze-ons - IGH ready
- Bushnell eccentric chain tensioner
- Handmade - in Seattle, WA

Smooth Shifting

We've been working with the Rohloff Speedhub since 2003 and we sell more Rohloff custom bikes than any shop in the U.S. We developed a braze-on system that makes the Rohloff as convenient to use as any normal wheel. We've also worked with all the different aftermarket shifting systems available for Rohloff and know which ones will give you the performance you're looking for.

Fork Choice - carbon, steel, or alloy touring
Geometry - any of our 20 sizes or custom
Belt Drive Option - no more oily chains
Rohbox option - Rohloff shifting with Sram DoubleTap levers
We are a full custom shop. If there's an option you're interested in but don't see, please ask
